CONTENTS

NUMBER 1/2

Special Issue: Deposition of Solids in Geothermal Systems

J. S. Gudmundsson and D. M. Thomas	1	Preface
J. Björnsson	3	Opening Address
D. M. Thomas and J. S. Gudmundsson	5	Advances in the study of solids deposition in geothermal systems
N. Andritsos and A. J. Karabelas	17	Laboratory studies of PbS scale formation in steel pipes
H. Ármannsson	25	Predicting calcite deposition in Krafla boreholes
S. Arnórsson	33	Deposition of calcium carbonate minerals from geothermal waters—theoretical considerations
W. R. Benoit	41	Carbonate scaling characteristics in Dixie Valley, Nevada geothermal wellbores
S. H. Chan	49	A review on solubility and polymerization of silica
A. Coudrain-Ribstein, A. Vinsot and P. Iris	57	Space and time evolution of the geochemical processes arising from geothermal injection in an aquifer
H. R. Crecraft and B. A. Koenig	65	Geochemical consequences of treated waste water injection at The Geysers, USA geothermal field
A. Criaud and C. Fouillac	73	Sulfide scaling in low enthalpy geothermal environments: a survey
E. Dalas and P. G. Koutsoukos	83	Calcium carbonate scale formation on heated metal surfaces
P. J. Fryer	89	Modelling the behaviour of heat exchangers undergoing scaling
D. L. Gallup	97	Iron silicate scale formation and inhibition at the Salton Sea geothermal field
S. R. Gudmundsson and E. Einarsson	105	Controlled silica precipitation in geothermal brine at the Reykjanes Geo-Chemicals plant

E. Gunnlaugsson and Á. Einarsson	113	Magnesium-silicate scaling in mixture of geothermal water and deaerated fresh water in a district heating system
J. L. Hernandez-Galan and A. Plauchu L.	121	Determination of fouling factors for shell-and-tube type heat exchangers exposed to Los Azufres geothermal fluids
Y. Hibara, M. Tahara and H. Sakanashi	129	Operating results and reinjection of Milos field in Greece
J. L. Honegger, I. Czernichowski-Lauriol, A. Criaud, A. Menjoz, S. Sainson and J. Guezennec	137	Detailed study of sulfide scaling at La Courneuve Nord, a geothermal exploitation of the Paris basin, France
R. Hurtado, S. Mercado and H. Gamiño	145	Brine treatment test for reinjection on Cerro Prieto geothermal field
R. Itoi, M. Fukuda, K. Jinno, K. Hirowatari, N. Shinohara and T. Tomita	153	Long-term experiments of waste water injection in the Otake geothermal field, Japan
P. W. Johnson	161	Fluid flashing and formation mineralization near producing geothermal wells: a literature review and simulation
A. J. Karabelas, N. Andritsos, A. Mouza, M. Mitrakas, F. Vrouzi and K. Christanis	169	Characteristics of scales from the Milos geothermal plant
G. Koutinas	175	High salinity fluid handling in Milos geothermal field
H. Kristmannsdóttir	183	Types of scaling occurring by geothermal utilization in Iceland
H. Kristmannsdóttir, M. Ólafsson and S. Thórhallsson	191	Magnesium silicate scaling in district heating systems in Iceland
R. Lesmo and C. Sommaruga	199	Deposition of solids from salt waters and brines in the Italian geothermal systems
B. Líndal	207	Solids deposition in view of geothermal applications in Reykjanes and Svartsengi, south western Iceland
B. Líndal and H. Kristmannsdóttir	217	The scaling properties of the effluent water from Kizildere power station, Turkey, and recommendation for a pilot plant in view of district heating applications

S. Mercado, F. Bermejo, R. Hurtado B. Terrazas and L. Hernández	225	Scale incidence on production pipes of Cerro Prieto geothermal wells
A. E. Milodowski, D. Savage, K. Bateman and C. R. Hughes	233	The precipitation of solids from potential heat exchange fluids for use in a HDR geothermal system in granite
M. Parlaktuna and E. Okandan	241	The use of chemical inhibitors for prevention of calcium carbonate scaling
S. Pieri, F. Sabatelli and B. Tarquini	249	Field testing results of downhole scale inhibitor injection
D. S. Pye, D. Holligan, C. J. Cron and W. W. Love	259	The use of Beta-C titanium for downhole production casing in geothermal wells
M. J. Reed	269	Thermodynamic calculations of calcium carbonate scaling in geothermal wells, Dixie Valley geothermal field, U.S.A.
C. A. Rochelle, A. E. Milodowski, D. Savage and M. Corella	279	Secondary mineral growth in fractures in the Miravalles geothermal system, Costa Rica
H. Thordarson and Th. Tomasson	287	Brine clarification at Svartsengi, Iceland: effect of pH and temperature on the precipitation of silica and its properties
A. H. Truesdell, J. R. Haizlip, H. Armannsson and F. D'Amore	295	Origin and transport of chloride in superheated geothermal steam
L. Vaca, A. Alvarado and R. Corrales	305	Calcite deposition at Miravalles geothermal field Costa Rica
F.-D. Vuataz, I. Czernichowski-Lauriol, C. Fouillac and S. Detoc	313	Chemical study of a low temperature geothermal fluid in a Triassic sandstone aquifer: scaling potential and fluid treatment (Melleray, France)
T. Yokoyama, Y. Takahashi, C. Yamanaka and T. Tarutani	321	Effect of aluminium on the polymerization of silicic acid in aqueous solution and the deposition of silica
B. P. K. Yung, H. Merry and T. R. Bott	327	Effects of particle–surface interactions on deposition and re-entrainment of a particulate fouling system
D. M. Thomas and J. S. Gudmundsson	337	Research directions in solids deposition in geothermal systems
	343	List of Participants

NUMBER 3

J.-S. Gudmundsson and H. Thráinsson 357 Power potential of two-phase geothermal wells

R. McKibbin and K. Pruess 367 Some effects of non-condensible gas in geothermal reservoirs with steam–water counterflow

J. J. Gelegenis, V. A. Lygerou and N. G. Koumoutsos 377 A numerical method for the solution of geothermal reservoir model equations

N. D. Mortimer and R. Harrison 393 Comparison of U.K. geothermal and U.S. oil well costs

F. Urbani 403 Geothermal reconnaissance of northeastern Venezuela

A. G. Reyes and C. M. Cardile 429 Characterization of clay scales forming in Philippine geothermal wells

G. Gianelli and G. Scandiffio 447 The Latera geothermal system (Italy): chemical composition of the geothermal fluid and hypotheses on its origin

M. Fytikas, T. Kavouridis, C. Leonis and L. Marini 465 Geochemical exploration of the three most significant geothermal areas of Lesbos Island, Greece

477 New Patents

NUMBER 4

Special Issue: Testing Geophysical Exploration Techniques on the Island of Milos (Greece)

E. Staroste and J. Wohlenberg 481 Introduction: the background to the Milos geophysical project

M. Fytikas 485 Updating of the geological and geothermal research on Milos island

C. P. Thanassoulas 497 Application of the self potential technique over the Milos geothermal test site

C. Drews, N. Fürch, H. M. Maurer, G. Musmann and P. Weidelt 507 Active audiomagnetotellurics on Milos (Greece) for determination of electrical conductivity distribution and its correlation with geothermal anomalies

V. R. S. Hutton, D. Galanopoulos, G. J. K. Dawes and G. E. Pickup 521 A high resolution magnetotelluric survey of the Milos geothermal prospect

V. Haak, O. Ritter and P. Ritter 533 Mapping the geothermal anomaly on the island of Milos by magnetotellurics

A. Beauce, H. Fabriol, D. Le Masne and J. P. Decriaud 547 Test of an integrated methodology for high enthalpy exploration on the island of Milos (Greece)

N. Ochmann, D. Hollnack and J. Wohlenberg 563 Seismological exploration of the Milos geothermal reservoir, Greece

A. Hirn, M. Sachpazi and A. Nercessian 579 Elements for a model of the geothermal field of Milos from seismological data

D. C. Booth, S. Schleper, S. Crampin, N. Ochmann and J. Wohlenberg 597 Shear-wave splitting observations on Milos, Greece

M. Fytikas, J. D. Garnish, V. R. S. Hutton, E. Staroste and J. Wohlenberg 611 An integrated model for the geothermal field of Milos from geophysical experiments
